

Procon 104E240F11BA Series 4 Bolt On Pump – 240 GPH 250 PSI

The Procon 104E240F11BA bolt on pump has a self priming design and durable brass construction.

It is not for use in food contact applications. This pump has nitrile elastomers and plastic high temperature solid valves capable of operation up to 250 PSI and 240 GPH.

This pump is great for use in circulation systems, reverse osmosis filtering, booster pumping, solar energy systems, hydraulic systems, desalination and more.

SPECIFICATIONS

Inlet/Outlet Port	1/2" NPT
Max PSI	250
RPM	1725
Max GPM	4.0
Dimensions	4.1" x 3.88" x 4.88"

FEATURES

- 240 GPH flow rate
- 250 PSI maximum discharge pressure
 - 1725 RPM
- Clockwise rotation (view from nameplate end)
 - Self priming (water) 6' maximum lift
 - 1/2" NPT inlet & outlets
 - Bolt on type
 - Standard clearance
 - Nitrile elastomers
 - Plastic high temperature solid valve
