

## **Procon 112A125F11XX Series 2, 100 GPH, Clamp mount**

The Procon 112A125F11XX pump is a rotary vane style pump made from brass. This low vibration pump has a 100 GPH maximum flow rate, 3/8" inlet and outlet ports, and 250 PSI maximum discharge pressure.

Procon Series 2 pumps are self-priming, designed to avoid metal-to-metal contact, and are almost entirely maintenance-free throughout their lives (other than cleaning the strainer). This pump meets NSF requirements and can be used for food and drink applications.

### **SPECIFICATIONS**

Inlet/Outlet Port	3/8" NPT
Max PSI	250
RPM	1725
Max GPM	2.08
Dimensions	3.56" x 3.49" x 3.86"

### **FEATURES**

- 100 GPH flow rate
- 250 PSI maximum discharge pressure
- Clockwise rotation (view from nameplate end)
  - Self priming (water) 6' maximum lift
    - Meets NSF standards
    - Clamp on mounting
  - FDA grade nitrile elastomer
  - Standard clearance
- 303 grade stainless steel shaft
  - No relief valve
  - No setting
